- Increase the salary of most recent employee by 17.5% and most senior employee by 21.5% and update the original table in the database.
 - Show a table in php where instead of column 'SALARY', show a column 'PERCENTAGE'. In the percentage column, show the percentage of salary the 8 employees get instead of their actual salary. For example, in the first row instead of 24000, you have to show 27.65%.
 - Update the table. Decrease salary by 10% where salary is greater than 10000, increase salary by 10% where salary is less than or equal to 10000.
